

When a Home Team is forced to play @ the Opponent's Field because they are unable to use their field

A home team may be forced to play at an opponent's field when they share pits with another team. The team they share pits with may have a better record and is also scheduled to play that day on their home pits. (e.g. knock-downs)

The Team with the better record will play on their home field.

The other Team will play on their opponent's field as **"Home Team on paper only"**

They will set up 2nd as if they were home and throw colored shoes.

The actual Home Team will be responsible for taking care of pits and supplying refreshments.

The actual Home Team will also derive the benefit of selling the 50-50's

Also note: when 2 teams play on a **neutral** set of pits...the team who is scheduled to be home team...will be the home team in the game. They will be responsible for the pits, refreshments, 50-50 etc. regardless where the game is played.
